**TEDU**

# TEDU's Learning Support System (LSS): the First Platform that Leverages Data to Power Academic Support at Scale

TEDU consolidates academic support programs into **one student and administrative experience,** utilizing analytics and real-time data for personalized support, proactive assistance, and cost-saving automation.

Academic Coaching    Writing Studio    Study Group

Supplemental Instruction    Tutor Center    ... and more coming soon

# Campus-Wide Platform that Streamlines Student Support Delivery While Driving Actionable Insights

Enhance student accessibility by unifying all support programs

Tailor-made modules align with distinct support methodology requirements

Capture and analyze engagement data for informed decision-making

Maximize availability, increasing engagement and optimizing budget use
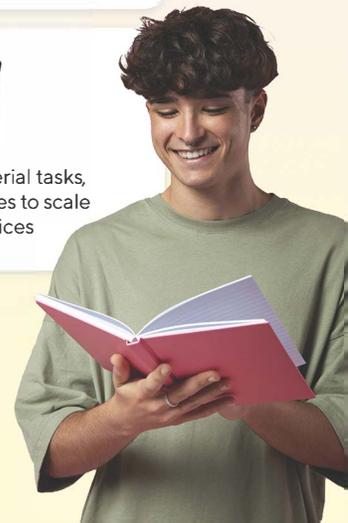

Boost student success with personalized support for at-risk individuals

Automate managerial tasks, freeing up resources to scale support services

Strategic Partners Available for Integration

# How TEDU Works on Your Campus

## Students

TEDU takes in data from the university in real-time

▽

Students access their dedicated campus TEDU for available support programs

## Students engage with their programs on TEDU and all data is captured for administrators

## Administrators

Students need academic support outside the classroom

▽

Program Managers personalize support programs to students based on their data

---

# A More Unified Support Environment

## Without TEDU

Support programs are **manually operated and siloed,** making engagement and collaboration a challenge

Student · Campus · Program · Program · Student · Student · Campus · Program

Legacy processes hinder data collection preventing program improvement

## With TEDU

**One unified** platform for all academic support programs driving personalized student engagement

**TEDU** Powered by real-time student and engagement data

**Support programs are tailored to all students across all campuses**
